DULET

ULTRALIGHT TACTICAL EVACUATION DEVICE

Ultralight disposable sheet for transfer and coverage, waterproof and absorbent. It keeps the wounded dry to reduce heat loss and protects stretchers and surgical tables to prevent cross-contamination. It can be used to transport, transfer or move casualties of any weight.

FEATURES

- ✓ 100% Latex Free.
- ✓ White upper layer in contact with the patient: 100% hydrophilic polypropylene of 20 g/m².
- ✓ Intermediate layer of S.A.P. sodium polyacrylate average density of 65 g/m² ± 5 g. between two sheets of 5 g cellulose tissue.
- ✓ 42 g/m² green polyester underlay.
- ✓ Approximate weight of the product ready for use 120 g.
- ✓ 50mm 144 decitex tape polyester traction handles sewn to the sheet with 150 dtex black nylon. On this a second one of 25 mm sewn 5 cm leaving sections of 19 cm free.
- ✓ Absorption capacity ≥2000 ml/m².
- ✓ Theoretical traction resistance 220 kg that allows the patient to be moved by pulling the sheet and using it as a transfer.
- ✓ Tolerances: Measurements ± 1 cm/m. Weight ± 10% / pieza.
